In your experience, what common gaps exist between the expectations of building operators and the delivered Building Automation System?

What limitations exist in Building Automation Systems? What can they do and what can't they do?

In your opinion, why do Building Automation Systems receive such a negative reputation in the K-12 market? What steps can you suggest to improve project outcomes?

Often the approach by building operators regarding Building Automation Systems is “Set It and Forget It”. What advice can you offer us in terms of the minimum standard of care for system maintenance?

In your experience, what is the primary reason that Building Automation Systems are not better managed in schools?
